Hi Israel,

Apologies for the slow response.

Each QNN release has a LICENSE.pdf file, which includes language in section 1(iv) to permit redistribution under these terms:

1. the QAIRT components are distributed only in object-code form; (.dll, .so, .exe files)
2. they are incorporated into / distributed as part of your product, rather than offered as a standalone QAIRT package;
3. applicable Qualcomm proprietary/copyright notices are retained;
4. applicable third-party notice/license obligations are preserved;
5. the customer complies with the other restrictions, including export controls.

Please let us know if you have any additional questions.

Thank,
Ann
